

The Eaton County probate packets were indexed in the past and in the last 1 1/2 years, we have been scanning the packets.

This index is a combination of the original index and the Scanned File Name as we get them scanned. If there is a name appearing in the Scanned File Name column, there is a scanned file in our library. In some cases, there are errors in the original index. Because these names appear in our Index System, we have kept the original name with a note explaining what it should be. The correct name is listed as a 'New' record. Many of the 'New' names are simply multiple packets for one name. Others are actual errors or are missing from the original index. While these names may appear to be hyperlinked to the pdf file, they are not linked on this list.
